

ECONOMIC SYSTEM - Definition and placement of The Commune within an economic landscape

Although its goal is to develop social innovation in the city -and thus to contribute in bettering the living quality of various groups of citizens-, *The Commune* does not take the legal form of a foundation. It remains a project powered by the design studio This is BOUW, V.O.F., in constant collaboration with private and public partners, and with a maximum transparency. *The Commune* will not generate profit: all funds realised in its operation will be invested in *The Commune's* development (Empower, Apply, Show).
