Gloves with a mission

## Our mission

Euronitrile Join Hands! is fulfilling a need for professionals who depend on single use examination gloves and simultaneously want to take responsibility for the polluting aspects of these products.

As a partner of our mission you will get the trusted product you need during the development of a sustainable alternative. This way, we can use our revenues to fund our mutual ambition. Your contribution accelerates a sustainable solution towards a cleaner world.

“

Each year 300 billion non recyclable / non-biodegradable disposable examination gloves add to the growing waste mountain. This amount is increasing year by year.

In 2023 the use of disposable gloves is expected to rise to 400 billion a year.

## Our goals

### Achieve sustainability

We offer a practical and scalable solution that enables us to create a circular economy. Your purchase of our gloves is used to achieve sustainability goals.

### Buy social: Together we can speed up innovation

We are building a bridge between business and research. We will use the financial power of companies who are willing to put in their purchasing power to achieve a cleaner world.

### Direct contribution

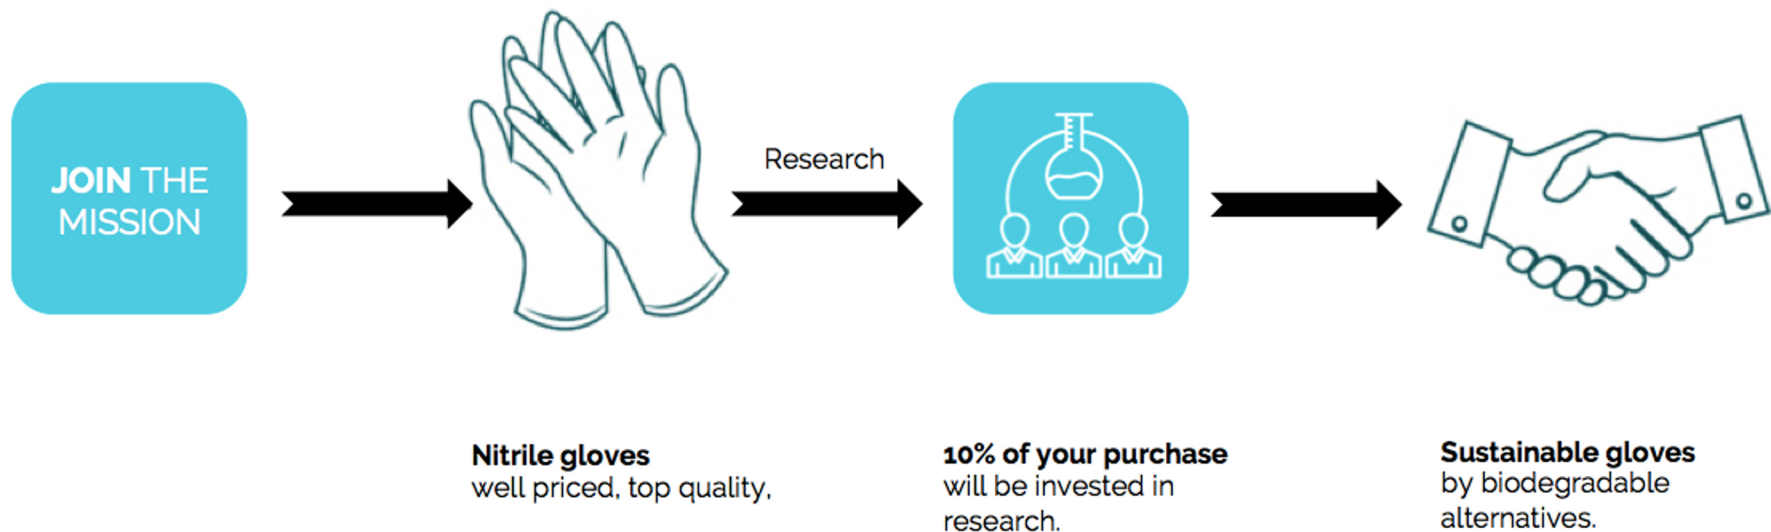

Your purchase is a direct contribution to the development of advanced technologies that will reduce the plastic footprint of examination gloves..

# Our way of working

Your supplier with sustainable objectives

We deliver the gloves you are used to, for the price you are used to.

In the meantime, we create a sustainable glove by using our turnover to accelerate research.

# What do we offer?

## Flexibility

We aim to include a variety of partners to join us on our mission. Do you have specific needs related to supply, distribution or anything else? Please let us know! We love to get in touch with you.

## Transparency

We are transparent in our decision-making processes and the progress we make towards reaching our goals. An executive summary of the annual report will be made public each year.

## Delivery

For large volume customers we prepare an annual forecast and communicate a starting date for delivery. This way, we can provide the service you deserve. In addition, we strive for a sustainable and cost effective supply chain.

## Certification

Our premium soft nitrile gloves are tested and certified and meet the following European Directives.

### EU

#### Directives on medical devices

MDD 93/42/EEC (Class I)

### Personal

#### Protective Equipment Directive

PPE 89/686/EEC Personal
